About Us

COCHIN MARITIME ACADEMY & SNEF ACADEMY INDIA

Skill Up National Education Foundation focuses on job-oriented technical studies for individuals who have completed 10th grade and are at least seventeen and a half years old. We offer counseling and training in various locations including Kochi, Ernakulam, Mumbai, and Chennai.

The programs aim to address unemployment issues, particularly among educated individuals, by providing specialized training in fields like maritime, technical studies, and logistics. Accredited by maritime authorities and ISO, they offer a range of courses aligned with national education policies.

The academy emphasizes safety training and skill development, especially for coastal communities, in collaboration with government initiatives like SAGAR MALA. Courses cover a wide range of subjects including marine engineering, logistics, accounting, and culinary skills. They aim to bridge the gap between education and employment by offering practical, job-oriented training and facilitating job placements through their network.

Additionally, we provide free services such as CV formatting and job provider contacts to help individuals secure employment opportunities domestically and abroad.
